Summary

Machine Learning–focused Computer Science student skilled in Python, FastAPI, and end-to-end ML application development. Experienced in building ML pipelines, training models, and deploying scalable prediction systems through REST APIs. Proficient in Scikit-learn, Pandas, SQL, Docker, and Google Cloud Platform, with a strong interest in AI-driven and LLM-based applications focused on clean architecture and real-world usability.

Education

Swami Vivekananda University **Aug. 2023 – Jul. 2027**
Bachelor in Computer Science and Engineering *Barrackpore, WB*

- YGPA: 1st Year: 8.86 | 2nd Year: 8.76

Projects

End-to-End ML Prediction System | Live Link | Github | *Scikit-learn, FastAPI, Pandas, HTML*

- Built an end-to-end machine learning application for predicting insurance premiums using data preprocessing and supervised learning techniques.
- Developed REST APIs using FastAPI to serve real-time predictions with a scalable backend architecture.
- Designed an interactive frontend interface for user input handling and seamless integration with the deployed ML model.

ML Model API | Github | *FastAPI*

- Developed a REST API to serve machine learning model predictions.
- Prepared the system for containerization and scalable deployment.
- Structured the backend with request validation for maintainability and reliable API responses.

AI-LinkMind | Live Link | Github | *React, Kotlin, LLM*

- Built an AI-powered URL manager that categorizes and organizes saved links automatically.
- Developed an Android application using Kotlin with WebView integration for improved accessibility and mobile usability.
- LLM-based processing to generate contextual and smart content categorization.

MQCMaker | Live Link | Github | *React, LLM*

- Developed a lightweight MCQ generator for concept strengthening.
- Designed the platform without login and caching mechanisms to maintain simplicity and fast access.
- LLM-based question generation to create topic-focused MCQs dynamically from user input.

Certification

Basic Python Programming Certification **Jun 2023 – Dec 2023**

- Organization: Academy of Skill Development (ASD), Grade: A+
- Certificate Link

Technical skills

Programming & Fundamentals: Python, HTML|CSS, Data Structures & Algorithms, System Designed
Machine Learning & Data Science: Supervised Learning, EDA, Feature Engineering, Model Evaluation
Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
ML Engineering & Pipelines: Scikit-learn Pipelines, Column Transformer, End-to-End ML Workflow
Backend & API Development: FastAPI
Cloud & DevOps: Google Cloud Platform (GCP), Docker, Containerization
Database Management: SQL
Tools: Git, GitHub, Jupyter Notebook, VS Code
